IMPACT OF LAND USE CHANGE

Changes in land use and vegetation cover, resulting from the expansion and extension of anthropogenic activities, generate negative impacts on biodiversity and the provision of ecosystem services, and contribute significantly to climate change processes.

we have to protect

NATURAL PROTECTED AREAS (NPAS)
REPRESENT A PUBLIC POLICY
INSTRUMENT TO ADDRESS TRENDS IN
ECOSYSTEM CHANGE AND
TRANSFORMATION, AS WELL AS
ALLOWING FOR THE CONSERVATION
OF RESOURCES.

THE PNAS ARE REPRESENTATIVE
OF THE DIFFERENT ECOSYSTEMS
PRESENT IN
THE COUNTRY AND COVER
APPROXIMATELY 12% OF THE
NATIONAL TERRITORY.
